

About the company

Description of the company

The NOCH company was founded in 1911 by Oswald Noch, great-grandfather of the current managing director, in Glauchau in Saxony. Over the years, the family-run company has developed into a specialist in model landscaping.

In 2009, we founded the company NOCH Asia in Saigon (Ho Chi Minh City), Vietnam, as a 100% subsidiary of NOCH Wangen.

Over 2,000 products on the topics of terrain and track construction, bridges and viaducts, portals, walls and arcades, landscape design with trees and bushes, buildings and figures, vehicles and decorations, model railways and much more are available for hobbyists.

The range is rounded off by highlights from the product ranges of our partners: ROKUHAN, Athearn, Proxxon and Ammo.

Sustainability profile

Fair and environmentally friendly production of modelling and landscaping products.

We are constantly working to make our company more sustainable step by step. Among other things, we are gradually switching our packaging from plastic to cardboard and looking for solutions in the production process.

Membership of the FTO is a matter of course for us in order to contribute to humane product manufacturing for us and our partners.

NOCH GmbH & Co. undertakes to check the entire supply chain for the human and environmentally friendly manufacture of products and to act in accordance with the principles of transparency and credibility.

Not only our own sites in Wangen / Germany and Ho Chi Minh City / Vietnam are scrutinised, but also all products that we receive from our suppliers. In addition to high quality standards, social standards are also analysed and guaranteed in order to treat everyone involved in the production process fairly.
